

Big Sky 7

Region: Big Sky Bedrooms: 4 Sleeps: 8 Bathrooms: 3.5

A private mountain lodge nestled on forested grounds with sweeping mountain views, is a tranquil retreat that puts the beauty of Big Sky at your doorstep.

Located a 10-minute drive from the Mountain Village and Madison Village base areas, this two-level, 4-bedroom home lies steps from world-class snowshoe and cross-country ski trails in the winter, and miles of hiking and biking trails in the summer.

Floor-to-ceiling windows on both levels offer striking views of the surrounding mountains and evergreen trees, allowing light to flood the home while creating a feeling of connection to the outdoors. A striking entryway with high ceilings, stone floors and unique copper doors welcomes guests as they pass a stone fireplace to an airy, modern great room with plush sofas and fur-lined club chairs facing a framed view of Lone Peak.

Styled in modern Western decor, the home features numerous pieces of original art, including a portrait of the owners horse, Chico -- son of Cass Ole, the Arabian stallion who was portrayed in *The Black Stallion* in the popular movie series.

Antique furnishings tastefully accent modern decor in the 8-seat dining area just beyond the great room, where picture windows showcase panoramic views surrounding the table. The dining area opens seamlessly onto a gourmet kitchen with an over-sized refrigerator, separate wine fridge, two ovens and a large center island.

After a day of exploring the outdoors, four spacious bedrooms await, each with hardwood floors, picture windows and stylish, mountain-modern decor.

A private oasis, the master bedroom features a king-sized bed with a fur accent throw, a large-screen TV and antique, Western-inspired furniture. Step into the spacious, white-marble bath to enjoy the luxurious soaker tub and glass shower. Asian-inspired, bear-proof doors open onto a private patio allowing you to let in the cool mountain air.

The second bedroom room features hardwood floors, Western decor and a queen-sized bed. Walk into the en-suite bath to soothe sore muscles in the tub/shower combo with rainfall showerhead. This room also opens onto a private patio with expansive mountain views.

The third bedroom, styled in Asian-inspired decor, has a king-sized bed, hardwood floors and picture windows with views of the evergreen trees outside.

As the only bedroom located on the main level, the fourth bedroom room offers maximum privacy. Sink into the king-sized bed or step onto the balcony to take in sweeping mountain views. Guests of this room and Bedroom 3 share a unique, turquoise-marble bath on the main level with a vanity and glass walk-in shower.

Although you may never want to leave this tranquil sanctuary or the surrounding network of trails, a private garage and ample driveway space give you plenty of room to accommodate multiple cars, allowing for a day of varied adventures. While part of your group enjoys skiing or snowboarding at Mountain Village, a 10-minute drive, others can explore Town Center or Meadow Village, both a 20-minute drive.

That flexibility combined with panoramic views and a feeling of tranquility make this home an ideal retreat for guests who want to explore all that Big Sky has to offer.

Please be advised that this home does not have air conditioning.
