

📍 Lurin

Villa Loukoko

🛏 3 🚿 3 👥 6

Touches of color and eye-catching pieces of art set Villa Loukoko apart from other luxury rental properties on St. Barth. The modern and convenient home is situated in Lurin, close to town in an amazing and private area, and it has a view over St. Jean Bay and the airport.

The interiors are sleek and contemporary, but the artwork and the colors give them a warm feeling of home. In many rooms, some walls are made entirely of sliding glass doors, allowing for stunning ocean views and cool island breezes, should you choose to open them up.

The living room and fully equipped kitchen share one gracious and open space. There are windows on both sides of this main room, and a skylight overhead, which adds another dimension and creates different ambiances throughout the day. The space opens up onto the terrace, which has an infinity-edge pool and a covered area for lounging and dining. An unusual feature of the terrace is a television hidden in the floor, which can be elevated when you want to watch something or concealed so that you don't notice it at all.

One of the bedrooms is to the right side of the living room, and the other two are to the left but they do not connect. All have full walls of glass, access to the terrace, ocean views, and ensuite bathrooms with a lot of natural light.

The parking is one level down and can be reached via interior or exterior stairs. Along with the outdoor parking area, there is an indoor parking garage, which doubles as a game room, with a ping pong table, table football, and pool table.

Rounding out Villa Loukoko is a small garden hideaway up a few stairs from the main level. It has a nice view and is ideal for yoga or meditation.
