

# Villa Phebus

Region: St Jean Bedrooms: 4 Sleeps: 8 Bathrooms: 4

Taking its name from the alter ego of the Greek god Apollo, who was said to be the sun god personified, Villa Phebus is a joyful, exuberant celebration of light, warmth and eclectic design. It's an unorthodox, inviting place to let your hair down, kick your shoes off, and succumb to the sunshine of the Caribbean. Villa Phebus' flexible layout makes the rental property appealing for couples, groups of friends traveling together, or extended families on vacation. Here, in this tranquil retreat, you work far less hard than the Phebus of mythology ever did, and succumb to the sea views and ocean breezes coming in over St. Jean.

Even though it's an audacious experiment in design with a lime green kitchen island, Villa Phebus is an imminently livable and relaxing home. The views over St. Jean Bay are tremendous, and the design makes the most of those vistas.

The villa unfolds across two levels, with everything facing the sea. The upper level comprises a living area as well as the gourmet kitchen.

The master bedroom is on the lower level, by the heated swimming pool and terrace, along with two more bedrooms. One of these has two single beds making it a fun nest for children. The other bedrooms are dressed in shades of gray and have sleek, minimalist furnishings and large, mirrored closets. Upstairs is a fourth, more private bedroom with access to the terrace that has views in two directions. Like the master bedroom, it has a spacious bathroom and two-headed shower.

If you choose to venture out, Nikki Beach, St. Jean Beach and the shopping area are nearby. Or stay in and soak up that sunshine and those views. The main terrace has ample areas for sitting, dining and barbecue, along with plenty of chaises downstairs by the pool.
